Hazardous Weather

Hazardous Weather

Another hot day is expected across North and Central Texas with high temperatures in the mid to upper 90s. A little more humidity is expected today so heat indices will nudge upward toward 100 degrees in many areas. A cold front will move through the Plains on Monday and scattered showers/storms are expected to develop by afternoon. A few severe storms may be possible with a damaging wind threat.

A Heat Advisory is in effect for Starr County from 1 PM to 7 PM today. The combination of near triple digit temperatures and elevated humidity values will create oppressive and potentially dangerous conditions. Heat Indices are expected to reach between 110 and 114 degrees this afternoon. Visit weather.gov/heat for more safety tips.

Hazardous Weather

Heat Warnings and Advisories

This afternoon through this evening.

Weather Forecast Office
Midland/Odessa, TX
Issued June 20, 2021 2:53 AM CT

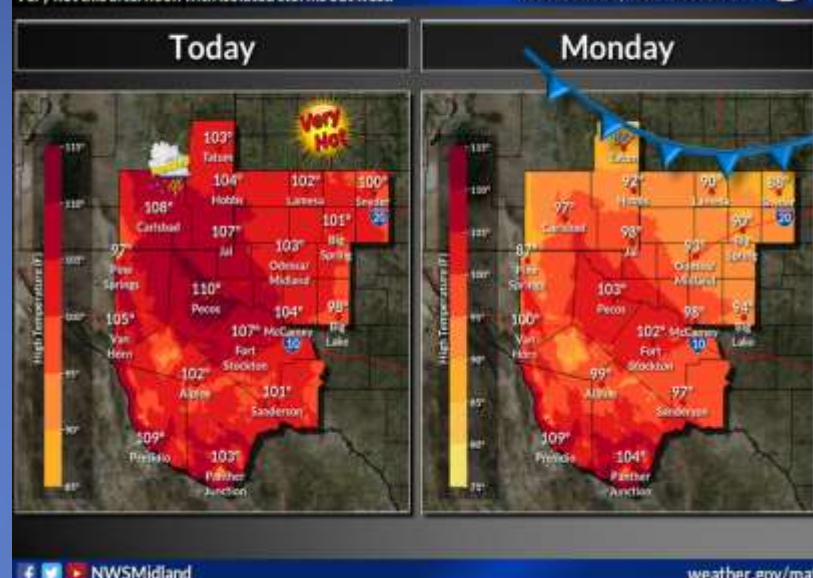

A Heat Advisory is in effect for much of the region this afternoon. An Excessive Heat Warning is in effect for this afternoon for elevations between 5000 and 6500 feet in the Davis, Guadalupe, Delaware, and Chinati mountains and surrounding foothills.

Cooler Temperatures Ahead!

Very hot this afternoon with isolated storms out west.

Weather Forecast Office
Midland/Odessa, TX
Issued June 20, 2021 2:43 AM CT

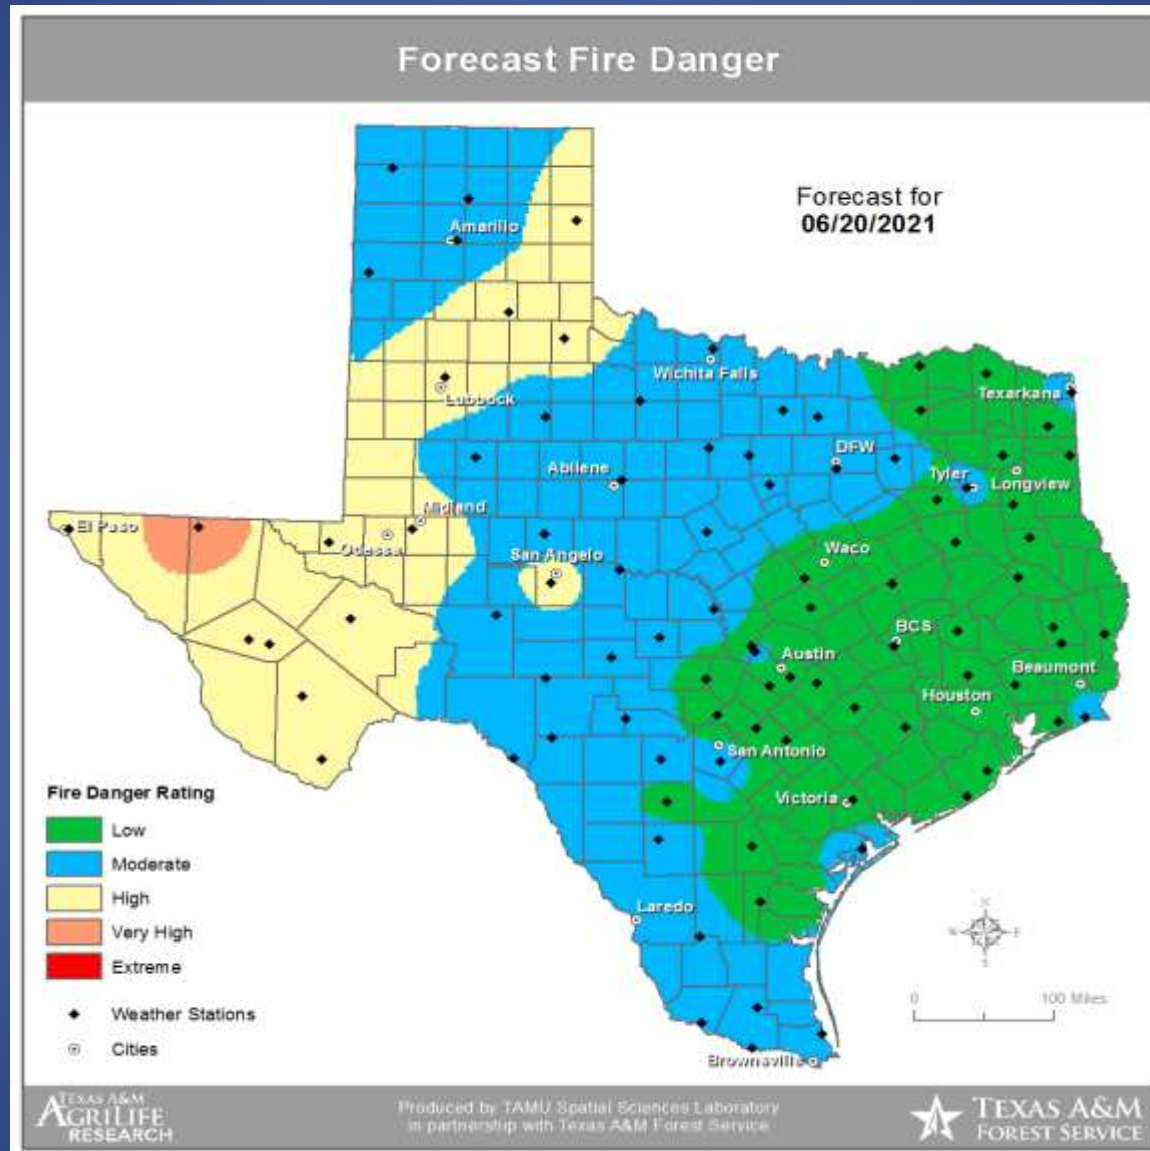

Extremely hot temperatures are expected this afternoon with much of the region either in a Heat Advisory or Excessive Heat Warning. A few high based thunderstorms will be possible across SE New Mexico and the higher terrain out west, but not much precipitation is expected with dry lightning and gusty winds the main concern. A cold front moving through on Monday will help cool us down north of the Trans Pecos, but many areas to the south and along the Rio Grande will remain at or near Heat Advisory criteria on Monday.

Weather Warnings/Advisories Issued
